

Size Analysis of Welsh Business: StatsWales data

This note describes what is in the folders on StatsWales for the size analysis of Welsh business release.

There are two sub-folders available:

Headline data – this is the annual release of data from October of each year. The data in this folder contains annual estimates of enterprises by area, industry and size-band.

Technical data (2006 data release) – this is from the old three yearly release of size analysis. In those releases there was a technical annex which contained additional statistics on Welsh headquarted enterprises and local units. These have not been updated in the annual releases since 2010. Therefore these data have not been updated since they were published in 2007 and will not include revisions from the data sources used to compile the data. The 2007 release can be found at <http://wales.gov.uk/topics/statistics/headlines/econ-2007/hdw200708021/>

The methodology used to derive the size analysis statistics are available within the folder.
